

## Coat Color and Trait Certificate

<b>Call Name:</b>	Dava	<b>Laboratory #:</b>	264376
<b>Registered Name:</b>	Regen's Black Magic	<b>Registration #:</b>	SS08524701
<b>Breed:</b>	Labrador Retriever	<b>Microchip #:</b>	956000005099517
<b>Sex:</b>	Female	<b>Certificate Date:</b>	Nov. 16, 2021
<b>DOB:</b>	Oct. 2018		

### This canine's DNA showed the following genotype(s):

Coat Color/Trait Test	Gene	Genotype	Interpretation
D Locus (Dilute)	<i>MLPH</i>	D/D	Non-dilute (does not carry dilute)
L Locus (Long Hair/Fluffy) - Lh <sup>1</sup> (Common Variant Found in Many Breeds)	<i>FGF5</i>	Sh/Lh	Shorthaired (carries one copy of long hair)

### Interpretation:

This dog does not carry any copies of the d<sup>1</sup> or d<sup>2</sup> mutations and has a D locus genotype of **D/D** which does not result in the "dilution" or lightening of the pigments that produce the dog's coat color. This dog will pass one copy of **D** to 100% of its offspring and cannot produce d/d dogs.

This dog carries one copy of the **Sh** and one copy of the **Lh<sup>1</sup>** mutation which results in short hair. This dog will pass one copy of **Sh** to 50% of its offspring and one copy of **Lh<sup>1</sup>** to 50% of its offspring. This dog can produce Lh/Lh offspring if bred to a dog that is also a carrier of an Lh mutation (Sh/Lh or Lh/Lh).

Paw Print Genetics® has genetic counseling available to you at no additional charge to answer any questions about these test results, their implications and potential outcomes in breeding this dog.

Associate Medical Director

Normal results do not exclude inherited mutations not tested in these or other genes that may cause medical problems or may be passed on to offspring. These tests were developed and their performance determined by Paw Print Genetics®. This laboratory has established and verified the tests' accuracy and precision. Because all tests performed are DNA-based, rare genomic variations may interfere with the performance of some tests producing false results. If you think these results are in error, please contact the laboratory immediately for further evaluation. In the event of a valid dispute of results claim, Paw Print Genetics will do its best to resolve such a claim to the customer's satisfaction. If no resolution is possible after investigation by Paw Print Genetics with the cooperation of the customer, the extent of the customer's sole remedy is a refund of the fee paid. In no event shall Paw Print Genetics be liable for indirect, consequential or incidental damages of any kind. Any claim must be asserted within 60 days of the report of the test results.
